

Collaborative Career Intelligence Platform

Augmenting Managers and Parents as High-Leverage Navigators for the Future of Work

EXECUTIVE SUMMARY

BEACHHEAD: INDIA & GCCS

DUAL-TRACK ARCHITECTURE

1. EXECUTIVE SUMMARY & CORE THESIS

Mentors, managers, and parents are the primary, most trusted sources of career guidance for direct reports and youth. However, they suffer from **advisor knowledge asymmetry**:

- **Anchor Bias:** Advice is heavily constrained to the advisor's own past career trajectory (what worked 10–20 years ago).
- **Macro Shift Acceleration:** Rapid AI adoption, skill obsolescence, and new career taxonomies outpace individual intuition.
- **The Advisor Dilemma:** Direct reports and students need future-facing guidance, but advisors lack real-time labor market telemetry, 3–5 year skill forecasts, and non-obvious pathway models.

Core Thesis: "Mentor-in-the-Loop" Career Intelligence
Do not replace the human relationship; augment it. Existing solutions deploy impersonal chatbots or static surveys. We build a dual-view intelligence copilot: empowering the mentor with pre-meeting briefing cards and talking points, while giving the mentee an interactive trajectory sandbox.

2. TWO HIGH-VALUE USE CASES

Track A: Workplace Enablement

B2B FOCUS

Relationship: Manager → Direct Report (Tech Leads, GCC Managers).

The Pain Point: 1-on-1s default to short-term sprint status checks. Employees switch jobs for 30–40% pay jumps because internal progression is opaque.

Deliverable: 1-on-1 Career Dossiers: Maps current competencies to high-demand skills (Service-to-Product, Distributed Systems, Applied AI).

Track B: Family & Youth Navigation

B2C FOCUS

Relationship: Parent → High School / College Student (Grades 9–12).

The Pain Point: Parental anxiety. Parents recognize legacy IT hiring is slowing, but have zero objective visibility into modern careers (Fintech, BioTech, UI/UX, Quant).

Deliverable: Data-Backed Career Roadmaps: Stream selection (Class 10), entrance exam strategies, and emerging career viability metrics.

3. WHY INDIA? CRITICAL MARKET DYNAMICS

1. High Spend on Education
Highest willingness-to-pay globally for career clarity, college coaching, and outcome assurance.

2. IT Services Disruption
Automation and AI have curbed mass campus hiring, breaking the traditional "Engineering → IT" template.

3. GCC Boom (1,600+)
Over 1.6M professionals in GCCs requiring product thinking, AI engineering, and specialized upskilling.

4. Local Data Moat
Western O*NET data is irrelevant to Indian tier-wise compensation, entrance exams, and placement models.

4. COMPETITIVE LANDSCAPE & WHITESPACE ANALYSIS

CATEGORY	KEY PLAYERS	PRIMARY FOCUS	WHY THEY FALL SHORT
Enterprise Talent Intelligence	Eightfold, Gloat, Fuel50	Enterprise-wide HR planning & gig matching	Built top-down for HR leaders; ignores 1-on-1 manager coaching.
K-12 Readiness Tools	Xello, Naviance, Scoir	US school district college applications	Administrative compliance tools; zero dynamic labor forecasting.
Indian EdTech & Assessments	Univariety, Mindler, YouScience	One-time psychometric quizzes	Static PDF outputs; no continuous skill graph or live market telemetry.
D2C Job Search AI	Kickresume, CareerGPS, Pluto	Resume rewriting & auto-applications	Reactive short-term job search rather than proactive career pathing.

Dual-View Collaboration Moat: Specialized interfaces for both advisor and mentee (Briefing Dossier + Interactive Sandbox).

Dynamic Trajectory Engine: Simulates: "Master skills A + B over 12 months \$|rightarrow\$ unlocks Role C with a 40% salary premium."

5. SYSTEM ARCHITECTURE & KEY MODULES

LAYER 1

Localized Labor Telemetry

- Indian Job Boards (Naukri, Cutshort, Instahire)
- Compensation Indices (AmbitionBox, GCCs)
- Academic Cutoffs (CUET, JEE, CAT, College Tiers)

LAYER 2

Career Intelligence Engine

- Skill Graph & Adjacency Inferences
- 3–5 Year Trajectory & Demand Forecaster
- Automated Advisor Briefing Synthesizer

LAYER 3

Collaborative Application Layer

- Advisor Briefing Room:** 1-on-1 prep dossier
- Mentee Sandbox:** "Day-in-Life" visualizer
- Shared Canvas:** Mutual goals & sync tracker

6. BUSINESS & MONETIZATION MODELS

B2C Family Model
HIGH-INTENT PARENTS

₹2,999 – ₹7,999 / dossier

Milestone packs (Class 10 Stream Selection, Class 12 College Roadmap) or ₹500/mo continuous tracking.

B2B2C Institutional
SCHOOLS & INSTITUTES

₹1.5L – ₹5L / annual license

Licensed to CBSE/ICSE schools, test-prep institutes, and private universities as a value-add counseling portal.

B2B Enterprise SaaS
GCCS & TECH FIRMS

₹300 – ₹800 / seat / mo

Sold to People Ops & Engineering VPs as a Manager Enablement & Retention Platform to curb employee churn.

7. IMMEDIATE DECISIONS FOR FOUNDING TEAM ALIGNMENT

⚡ **Critical Alignment Items for Founding Team**

1. Beachhead Choice: *Option A:* B2B Enterprise / GCC Focus (faster feedback, high willingness to pay) vs. *Option B:* B2C Family Focus (massive emotional urgency, zero enterprise sales friction).

2. MVP Scope: Deeply index the top 50 high-growth roles in modern tech, data, product, and design first before expanding horizontally.

3. Viral Wedge: Launch a free, frictionless "**AI 1-on-1 Prep Dossier Generator**" where any manager or parent can input 3 bullet points and receive an actionable brief.
